

Wolf Quant Investment Committee Report

Model run: 41b0abc0-f68e-404f-be1c-8cbb7310a901

As of: 2026-08-14 09:58:31.059577+00:00

Selected source: explicit_final_portfolio

Executive Summary

Readiness: READY

The report-readiness status is READY. This is a model/reporting control status, not investment approval. Model outputs indicate a dominant regime of steady_state_low_chaos with a Wolf Chaos Index of 48.5223673775244. Regime probabilities are estimates and should not be interpreted as reportedty. The 12-month expected total return estimate is 34.2%. Expected return is separate from realised return. The largest position represents 5.0% of the portfolio. The effective number of holdings is 20.0. Authoritative risk output reports VaR 5% at -0.4% and CVaR 5% at -7.1%. The DRL status is baseline_optimiser. DRL attributions are model attributions and not causal explanations.

- **Readiness** [normal]: The report-readiness status is READY. This is a model/reporting control status, not investment approval.
- **Regime** [warning]: Model outputs indicate a dominant regime of steady_state_low_chaos with a Wolf Chaos Index of 48.5223673775244. Regime probabilities are estimates and should not be interpreted as reportedty.
- **Expected Return** [normal]: The 12-month expected total return estimate is 34.2%. Expected return is separate from realised return.
- **Concentration** [normal]: The largest position represents 5.0% of the portfolio. The effective number of holdings is 20.0.
- **Risk** [warning]: Authoritative risk output reports VaR 5% at -0.4% and CVaR 5% at -7.1%.
- **DRL Governance** [normal]: The DRL status is baseline_optimiser. DRL attributions are model attributions and not causal explanations.

DRL reward decomposition

Data unavailable

Source And Methodology Notes

All sections consume precomputed model outputs. HTML is the authoritative report output. PDF is optional.

Attributions are model attributions, not causal relationships. LLM benchmark outputs are non-authoritative when available.

Limitations

- Missing upstream sections are shown as unavailable and are not fabricated.
- Expected return is separate from realised return.
- Regime probabilities are estimates and not certainty.
- No live execution instructions are created by this report.
